

DS Lab Evaluation

There will be Lab evaluation of Lab 1 and Lab 2 in the coming week in your respective Lab hours.

Keep following things in your mind before coming to the Lab:

1. C/C++ Programs of Lab exercises should be available in your N Drive. The program file names should be according to the convention as discussed in Lab. i.e. 221B023_Lab1_Q2.cpp.
2. Don't copy programs. For exact copy, you will be awarded zero marks.
3. The program similar to N drive should be there in your Lab record. Either you can **write the Lab record** or **take the print outs**. Read the instructions available on server for preparing the Lab record.
4. Even if you are writing the Lab record, it is required to take the printout of front page. Only single Index page is required for all the Lab exercises.
5. In the beginning of each program you should write declaration as follows:
"This program is written by [YOUR NAME (ER NO)]".
6. Mention the best and worst case time complexity of each program.

Note: To avoid any formatting issue during printing, give PDF version of the Lab record to the printing shop.

Absentees will be awarded zero marks. No late evaluation will be allowed.
