# Database Systems Lab

Lab -6

Creating Primary Keys and Foreign Keys in a Company Database

Step 1: Identify all primary keys for each table and list them.

Step 2: Identify Foreign Keys for each table and list them.

Step 3: Use following diagram to verify all the PKs and FKs

Step 4: Use understanding of Lab-5 to create primary keys (PK) for the Database created in Lab-3

Step 5: Use understanding of Lab-5 to create foreign keys (FK) for the Database created in Lab-3

Your Company Database is ready to be used for future experiments.
